

Agentic AI Internship (3-6-month)

Team: Growth & Product (working closely with the Chief Business Officer)

Type: Internship (Full-time, 3–6 months)

Start: December 2025 or January 2026

Potential: High performers may convert to a full-time role at the end of the program.

Why this role

Help build internal AI products that drive growth through content at Kerala Ayurveda. You'll orchestrate multi-agent systems and RAG pipelines that draft, review, fact-check, and ship content at scale. It's hands-on, fast-paced, and you'll learn directly alongside the CBO and the Head of Data & Analytics.

This is a learning-heavy role. It's not "easy," but it's fun—you'll ship real tools, get rapid feedback from users, and iterate quickly.

What you'll do

- Orchestrate AI agents: Design small agent teams (e.g., writer → fact-checker → editor) using frameworks like LangGraph or CrewAI. Define roles, prompts, IO contracts, guardrails, and escalation paths.
- Build & refine RAG pipelines: Chunking strategies, indexing, retrieval quality, grounding with citations; balance recall/precision for Ayurveda knowledge.
- Evaluate & test: Create golden datasets and harnesses for unit/integration tests; measure quality, latency, cost; prevent regressions via automated checks.
- Rapidly iterate architectures: Diagnose failure modes (hallucination, drift, formatting errors) and adjust prompts, tools, or graph topology until outputs hit the bar.
- Instrument & observe: Add tracing/telemetry for runs, token/latency budgets, and quality dashboards.
- Collaborate for impact: Translate growth goals into agent flows; ship internal tools that enable content production, SEO experiments, and campaign support.
- (Nice) Wire up tools via MCP: Use the Model Context Protocol (MCP) to connect agents to internal data/services.

What you'll learn here

- Practical patterns for agentic systems and RAG—beyond demos.
- Building evaluation loops and shipping with confidence.
- Product thinking for growth: experiment design, A/Bs, and content ops.
- How to move from prototype → reliable internal product quickly.

Location & schedule

IST working hours; Bengaluru office – Brigade Summit ITPL Main Road, opp Garudacharpalya Metro station

Stipend

₹20-30,000 per month

You'll be great at this if you have

Must-haves

- Comfort in Python or TypeScript and basic Git.
- Experience calling LLM APIs (any vendor) and writing prompt-code.
- A builder's mindset: you like owning problems end-to-end and learning fast.

Good-to-haves (nice, not mandatory)

- LangChain/LangGraph, CrewAI, LlamaIndex familiarity.
- RAG basics; vector DBs like FAISS/Chroma/Pinecone.
- Testing/eval tooling (e.g., Ragas, DeepEval, Langfuse or similar tracing/observability).
- Understanding or interest in MCP and tool adapters.
- Comfort with Markdown/HTML for content workflows and light SEO basics.

Don't tick every box? Apply anyway. We value curiosity and learning velocity.

Example projects you might ship

- A multi-agent content engine that drafts, fact-checks (via RAG), and SEO-optimizes long-form Ayurveda articles with citations.
- An internal brief→outline→draft workflow with automated style checks and editorial notes.
- An evaluation harness that scores content on grounding, structure, and brand tone, with regression alerts.

The stack you'll touch (indicative)

- Agents: LangGraph, CrewAI
- LLMs/Embeddings: vendor-agnostic (OpenAI/Anthropic/Mistral/etc.)
- RAG: FAISS/Chroma/Pinecone, chunking, hybrid retrieval
- Observability: tracing & run logs (e.g., Langfuse-like), prompt/version control
- Glue: Python/TypeScript, simple APIs, MCP tools where helpful

Application & selection

1. Apply with your resume/LinkedIn + GitHub and a short note on a project you've built (LLM or otherwise).
2. Short take-home (2–4 hours): build a tiny agent flow (writer→checker) or a mini-RAG that grounds answers with citations.

3. Conversation with the hiring team.
4. Final discussion with the CBO.

We value thoughtful code, clean prompts, and clear reasoning more than fancy UI.

How to apply

Email nishant@keralaayurveda.biz with subject line: “Agentic AI Internship — <Your Name>”. Include:

- Links to repos/demos (even rough ones!)
- A quick paragraph on why this excites you
- Earliest start (Dec '25 or Jan '26) and availability window

Kerala Ayurveda Ltd is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all interns and employees.
